Subject: Status Update Notification for the HB2001 Waterline Improvements Project

In March 2023 you likely received a survey notification letter informing you that the City of Newberg will be performing waterline improvements in or near your neighborhood.

Comprising seven separate sections of waterlines, this project will ultimately improve the City's water system in the area by replacing the lines identified on the attached map. Replacement of these water lines will occur over the next several years. Projects are not anticipated to be constructed in the order that they are numbered. Determination of construction project sequencing will depend on several factors and will likely be a somewhat fluid process.

Design by the City of Newberg's consultant Water Systems Consulting, Inc. (WSC) is in progress with the first construction phase anticipated to be advertised for bids in the Fall of 2024. Additional design and construction phases will continue throughout 2024 and beyond. Additional surveying and utility conflict potholing will occur as needed. Completion of all segments will occur prior to June 30, 2029.

Construction is anticipated to begin in Winter 2024/2025. The first segments planned to be constructed are segments I-1 and I-4 shown on the attached map. Please be aware that roadway improvements are not currently planned as part of these water line replacement projects.

If you have any questions or concerns about the project please contact Brett Musick Senior Engineer, City of Newberg at brett.musick@newbergoregon.gov or call 503-554-1631.

Watch for project information and updates on the City's Current Projects website:
<https://www.newbergoregon.gov/engineering/project/hb2001-water-line-improvement-project>

The City of Newberg and the consulting project team are committed to working together for a better community, delivering on projects while remaining mindful of your utility rates.

Sincerely,

Brett Musick, PE
Senior Engineer
